## Monte Antico Toscana IGT

It was the early 70s when Neil Empson, father of this wine, was sitting at the table with other Tuscan producers and had the idea of coining the term "supertuscan". With this word, we identify red wines produced in Tuscany that do not, on purpose, respect the traditional rules of preparation of the region, but use other types of grapes, especially cabernet sauvignon, in addition to or instead of the traditional Sangiovese and therefore not they can be classified as DOCG products. With the help of master winemaker Franco Bernabei, they made a wine using Sangiovese, Merlot and Cabernet Sauvignon. The grapes used for the wines come from about 200 hectares (500 acres) under vine in Maremma, Colline Pisane and Colli Fiorentini, as well as a few areas in Chianti.
